

## HELI/PSI EMISSIONS WARRANTY

The **California Air Resources Board, United States Environmental Protection Agency**, and Power Solutions, Inc. are pleased to explain the **emission control system warranty** on your 2009 or later large spark-ignition (LSI) engine. In California, new LSI engines must be designed, built and equipped to meet the State's stringent anti-smog standards. Power Solutions, Inc. must warrant the emission control system on your LSI engine for the periods of time listed below provided there has been no abuse, neglect or improper maintenance of your LSI engine. Your emission control system may include parts such as the carburetor, regulator or fuel-injection system, ignition system, engine computer unit (ECM), catalytic converter and air induction system. Also included may be sensors, hoses, belts, connectors and other emission-related assemblies. Where a warrantable condition exists, Power Solutions, Inc. will repair your LSI engine at no cost to you including diagnosis, parts and labor.

### MANUFACTURER'S EMISSION WARRANTY COVERAGE

The EPA COMPLIANT FUEL SYSTEM on 2009 and later large spark-ignition engines is warranted for **2500 hours** or **three years**, whichever occurs first (**3500 hours** or **five years** Engine Control Module and Catalyst). If any emission-related part on your engine is defective, the part will be repaired or replaced by Power Solutions, Inc. Items that require scheduled replacement per the Maintenance Schedule (such as Spark Plugs, Ignition Wires, PVC Valves, Filters, etc.) are only warranted during the initial service interval.

### OWNER'S WARRANTY RESPONSIBILITIES

As the equipment and LSI engine owner, you are responsible for the performance of the **required maintenance listed in your owner's manual**. Power Solutions, Inc. recommends that you retain all receipts covering maintenance on equipment and LSI engine, but Power Solutions, Inc. cannot deny warranty solely for the lack of receipts or for your failure to ensure the performance of all scheduled maintenance. As the equipment or LSI engine owner, you should however be aware that Power Solutions, Inc. may deny you warranty coverage if equipment or LSI engine or a part has failed due to abuse, neglect, improper maintenance or unapproved modifications. Your engine is designed to operate on gasoline and/or LPG. Use of any other fuel may result in your engine no longer operating in compliance with California's and the US EPA's emissions requirements. You are responsible for presenting your equipment or LSI engine to a PowerSolutions, Inc. distribution center or authorized repair facility as soon as a problem exists. The warranty repairs should be completed by the dealer as expeditiously as possible. If you have any questions regarding your warranty rights and responsibilities, you should contact Power Solutions, Inc. via telephone at **1-800-551-2938** or contact Power Solutions, Inc. in writing at:
